Introduction

The Freedom of Information Act

The Freedom of Information Act grants members of the public rights of access to all kinds of recorded information held by a wide range of public authorities. Information about the Act is available from the Commissioner's Office at www.ico.gov.uk

Publication Scheme

The Act requires every public authority to adopt and maintain a generic model publication scheme, which should be adopted and operated by all public authorities from 1 January 2009. Ditchling Parish Council adopted the generic model publication scheme and it is subsequently reviewed accordingly. It is intended to provide everyone interested in the Council with a comprehensive guide to the information that the Council will automatically or routinely publish or otherwise makes available to the public.

Freedom of Information Requests and the Publication Scheme

It is important to note that a publication scheme simply sets out the information that is routinely available. Information that is not listed in the Information Available Guide of this document can still be requested and it will be made available unless it can be legitimately withheld. This can be done by making a written request to the Parish Clerk who will reply within 20 working days after receipt of the request.

The Council's Commitment to the Act

Ditchling Parish Council is committed to openness and accountability and already makes large amounts of information available to the public, through its website, via the telephone, email, by post or by personal visits to the Parish Office where much of the information can be viewed free of charge. Occasionally it may be necessary to book an appointment.

Model publication scheme

This model Publication Scheme has been prepared and approved by the Information Commissioner. It may be adopted without modification by any public authority without further approval and will be valid until further notice.

This Publication Scheme commits an authority to make information available to the public as part of its normal business activities. The information covered is included in the classes of information mentioned below, where this information is held by the authority. Additional assistance is provided to the definition of these classes in sector specific guidance manuals issued by the Information Commissioner.

The Scheme commits an authority -

- a) To proactively publish or otherwise make available as a matter of routine, information, including environmental information, which is held by the authority and falls within the classifications below.
- b) To specify the information which is held by the authority and falls within the classifications below.
- c) To proactively publish or otherwise make available as a matter of routine, information in line with the statements contained within this scheme.
- d) To produce and publish the methods by which the specific information is made routinely available so that it can be easily identified and accessed by members of the public.
- e) To review and update on a regular basis the information the authority makes available under this scheme.

- f) To produce a schedule of any fees charged for access to information which is made proactively available.
- g) To make this publication scheme available to the public.
- h) To publish any dataset held by the authority that has been requested, and any updated versions it holds, unless the authority is satisfied that it is not appropriate to do so; to publish the dataset, where reasonably practicable, in an electronic form that is capable of re-use; and, if any information in the dataset is a relevant copyright work and the public authority is the only owner, to make the information available for re-use under the terms of the Re-use of Public Sector Information Regulations 2015, if they apply, and otherwise under the terms of the Freedom of Information Act section 19. The term 'dataset' is defined in section 11(5) of the Freedom of Information Act. The term 'relevant copyright work' is defined in section 19(8) of that Act.
